

## Clinicon SureGuide™ CO<sub>2</sub> Laser Fiber Delivery System

High precision and low thermal spread, coupled with non-contact or contact flexible fiber delivery, make SureGuide the system of choice for ENT and Neurosurgery procedures.

Clinicon Probes were designed in collaboration with Key Opinion Leaders from ENT, Neuro and Spine specialties for use in soft tissue applications.

PRI is proud to introduce the SureGuide™ CO<sub>2</sub> Laser Fiber Delivery System, *by Clinicon*. This revolutionary system enables the use of CO<sub>2</sub> laser energy through the flexible and reusable SureGuide Fiber Cable, eliminating the necessity of a cumbersome articulating arm. The distal Fiber Cable attaches to the reusable SureGuide Universal HandPiece. A series of disposable EndoProbes™ and LaserProbes™ attach to the Universal HandPiece to deliver safe and efficient, char free laser energy with minimal thermal spread or collateral damage to critical structures such as nerves and vessels.

SureGuide probes offer precise cutting/vaporization and coagulation capabilities required by ENT surgeons for procedures such as tracheal papillomas, tracheal stenosis, laryngeal cysts, bronchial tumors and benign lesions.

Universal HandPiece can be re-sterilized for use with disposable Probes.

SureGuide is the preferred tool of Neurosurgeons to treat soft tissue disorders including a variety of spinal, intracranial and pituitary tumors.

### SureGuide Advantages

- ✓ Precision vaporization and coagulation using CO<sub>2</sub> fiber technology
- ✓ Promotes 'ease of use' by eliminating the articulating arm
- ✓ Cost-effective, reusable FiberCable and HandPiece
- ✓ Disposable pre-sterilized probes in multiple configurations
- ✓ Delivers > 30 watts of CO<sub>2</sub> energy to tissue
- ✓ No gas cooling of fiber required
- ✓ Non-contact vaporization with greater visualization
- ✓ Allows the surgeon increased tactile control
- ✓ Ease of use with minimal instrument exchange and less bleeding lead to decreased procedure time
- ✓ Clinicon SureLase CO<sub>2</sub> Laser - compact table top design with TEM<sub>00</sub> beam profile

The Clinicon SureLase™ CO<sub>2</sub> Laser is the most powerful and reliable compact table top laser on the market today: with "Smart Electronics" for easy operation.
