

PRI Medical is one of the largest mobile laser and medical technology rental provider in the United States. We have been servicing the needs of urologists for over 30 years and strive to provide the latest technology to treat a variety of urological conditions. That is why we are pleased to introduce the **Evolve 150 Laser** for treatment of BPH.

BPH Laser ~ the Evolve 150 is a solid state laser system utilizing the 980nm wavelength designed to specifically treat BPH. This wavelength is ideal for quickly vaporizing the prostate and coagulating vessels simultaneously. The Evolve 150 provides 25% more energy than any other laser used to treat BPH today. It is safe, effective, quiet and our doctors like the excellent visualization during the procedure due to the invisible wavelength!

Comparison ~ 980nm / KTP / Nd:Yag / Ho:Yag

Highly economical & profitable solution ~ PRI can now offer physicians this patient friendly, gentle alternative to traditional surgical procedures. This laser is:

- Compact for easy setup in an Operating Room
- Plug into a 110-outlet / air-cooled and quiet
- Provides fast tissue ablation and a bloodless field
- 25% more energy to tissue / faster treatment times
- Reimbursable for in-office use

This system brings together the clinical advantages of fast treatment times, rapid recovery with the convenience of minimal post-operative care, providing considerable benefits for the patient.

Satisfy more patients in less time with the upgraded 150-watt, 980nm Diode laser treatment

EVOLVE 150 Laser System by Biolitec

Minimally invasive treatment for Urology procedures like:

- BPH / Soft tissue urology applications
